ABOUT

Data-driven professional with a background in Bioinformatics and experience across scientific research, biomedical data analysis, machine learning, business intelligence, and digital analytics.

Skilled in transforming complex data into actionable insights through SQL, Python, Power BI, statistical analysis, and data visualization. Combines scientific thinking, analytical problem-solving, and strong curiosity about human behavior, healthcare, and AI-driven systems.

Experience spans biomedical research, predictive modeling, dashboard development, content performance analysis, and AI-powered applications, with a growing focus on Business Intelligence, Healthcare Analytics, Marketing Analytics, and Data Science.

SKILLS

Data Analytics & Business Intelligence

- SQL
- Power BI
- DAX
- Data Modeling
- Dashboard Development
- KPI Analysis
- Data Visualization
- Exploratory Data Analysis (EDA)
- Business Analytics

Databases

- PostgreSQL
- SQL Server
- Relational Databases
- Data Warehousing

Machine Learning & AI

- Machine Learning
- Predictive Analytics
- Customer Churn Analysis
- Retrieval-Augmented Generation (RAG)
- LangChain
- FAISS
- LLM Applications

Digital Analytics & Growth

- Content Performance Analysis
- Audience Analytics
- Marketing Metrics
- Digital Strategy
- Conversion-Oriented Thinking

Tools

- Python
- Git
- Docker
- Streamlit
- Supabase

PROJECTS

Logistics Performance Dashboard | Power BI

Interactive dashboard developed to monitor logistics operations and delivery performance.

Highlights

- Delivery volume analysis
- Late delivery monitoring
- OTIF (On Time In Full)
- Regional performance comparison
- Branch-level operational insights
- Automated KPI calculations using DAX

Technologies

Power BI • DAX • Data Modeling

Portfolio:

sites.google.com/view/mathauskrugerportfolio

Customer Churn Prediction | SQL + Power BI + Machine Learning

End-to-end churn analysis project focused on identifying customers with high cancellation probability and supporting retention strategies.

Highlights

- Exploratory Data Analysis (EDA)
- Customer segmentation
- Churn driver identification
- Predictive Machine Learning models
- Probability scoring
- Business-oriented retention insights

Technologies

SQL • Python • Power BI • Scikit-Learn • Machine Learning

2Human – AI Conversational System

AI-powered conversational platform designed for emotional reflection and behavioral pattern recognition.

Highlights

- FAISS vector database with 2,000+ indexed text chunks
- Retrieval-Augmented Generation (RAG)
- Persistent memory architecture
- Streamlit interface
- Bilingual interactions

Technologies

Python • LangChain • FAISS • Streamlit • Supabase

<https://2human.streamlit.app/>

LifeSchema – AI-Assisted Schema Assessment

Prototype combining psychological assessment frameworks with conversational AI workflows.

Highlights

- Interactive assessment interface
- AI-assisted interpretation
- Data persistence
- Visualization of results

Technologies

Python • Streamlit • Supabase • OpenAI API

EXPERIENCE

Digital Analytics & Content Strategy

Casa da Luta | Independent Projects

2023 – 2026

- Developed digital content strategies focused on audience growth and engagement.
- Produced educational and promotional content for social media platforms.
- Monitored engagement and performance indicators.
- Applied analytical thinking to evaluate audience behavior and content effectiveness.
- Supported customer acquisition and retention initiatives through digital channels.
- Created content aligned with business objectives and community growth.

Research Assistant – Machine Learning & Biomedical Data

Catholic University of Pelotas

2023 – 2024

- Applied machine learning techniques to biomedical datasets.
- Performed data preprocessing and exploratory analysis.
- Worked with structured datasets and predictive models.
- Supported computational analyses for scientific research.

QA Automation Intern

Compass UOL

2023

- Automated API testing workflows.
- Performed backend validation and integration testing.
- Worked in Agile environments.
- Supported cloud-based software development processes.

Research Fellow – Bioinformatics

Federal University of Pelotas

2019 – 2022

- Computational analysis of biological datasets.
- Processing and interpretation of experimental data.
- Research in bioinformatics and computational neurobiology.
- Application of statistical and computational methods to scientific problems.

EDUCATION

Postgraduate Program in AI & Data Engineering (In Progress)

Anhanguera + EmpregaDados

Topics

- SQL & PostgreSQL
- Data Engineering
- Data Warehousing
- Cloud Computing
- Machine Learning
- Applied Artificial Intelligence

Bachelor's Degree in Biological Sciences (Bioinformatics)

Federal University of Pelotas

LANGUAGES

Portuguese — Native

English — Fluent

Spanish — Basic
